

Affirming and Supporting LGBTQ Children and Youth in Child Welfare

Capacity Building
CENTER FOR STATES

"Every couple of months, one of our kids would get killed. And it would always be a gay kid."

- Carl Siciliano, founder of the Ali Forney Center, the nation's largest organization dedicated to homeless LGBTQ youth¹

LGBTQ youth are disproportionately represented among victims of:²

- ▶ Bullying
- ▶ Harassment
- ▶ Family rejection

LGBTQ youth make up:

- 40%** of runaway and homeless youth³
- 20%** of children and youth in the foster care system⁴
- 15%** of children and youth in the juvenile justice system⁵

Sexual or gender minority status is associated with increased:

- ▶ Psychological distress
- ▶ Mistreatment
- ▶ Discrimination

LGBTQ young adults who reported higher levels of family rejection were more than:⁶

- 8x** more likely to report attempted suicide
- 5x** more likely to report high levels of depression
- 3x** more likely to use illegal drugs
- 3x** more likely to report engaging in unprotected sexual intercourse

Harmful Practices

LGBTQ children and youth are subjected to **harmful practices** when child welfare systems:

- ▶ Do NOT help LGBTQ children and youth find resources related to transitioning
- ▶ Do NOT provide acceptance, support, or understanding to LGBTQ children and youth
- ▶ Do NOT facilitate sexual orientation or gender identity exploration and development
- ▶ Do NOT present an unbiased view regarding sexual orientation, gender identity, or gender expression
- ▶ Do NOT recognize an LGBTQ child or youth's unique sexual orientation, gender identity, or gender expression
- ▶ DO make attempts to change an individual's sexual orientation, gender identity, and gender expression or lessen an individual's same-sex sexual desires through conversion or reparative therapy

Conversion Therapy

Conversion therapy is not supported by credible evidence and is potentially extremely harmful, particularly to children and adolescents. **One report found:**⁷

- ▶ Same-gender sexual orientation and variations in gender identity are part of the normal spectrum of human diversity
- ▶ Research does not support the idea that mental or behavioral health interventions can alter gender identity or sexual orientation
- ▶ Interventions aimed at a fixed outcome, such as gender conformity or heterosexual orientation, are coercive, can be harmful, and should not be part of behavioral health treatment

Healthy Approaches

When working with LGBTQ children and youth, child welfare systems should offer developmentally therapeutic approaches that:

- ▶ Affirm sexual orientation, gender identity, and gender expression (SOGIE)
- ▶ Comprehensively evaluate identity development and exploration⁸
- ▶ Identify and work to reduce sources of distress for LGBTQ children and youth⁹
- ▶ Engage parents, guardians, and caregivers¹⁰
- ▶ Consider school and community interventions¹¹
- ▶ Use LGBTQ-inclusive language related to family and relationship status¹²

Supporting Positive Development

Child welfare systems should promote resilience and positive development in LGBTQ children and youth. Developing social support and reducing or eliminating experiences of rejection in family, community, school, and health care environments has been shown to have significant positive impacts on health and well-being.¹³
